Help is at hand with the FREE 24/7 Roadside Assist*. Designed to provide protection to Hyundai owners in case of accidents, vehicle breakdown, parts malfunction or even a flat tyre. Roadside Assist will provide you with assistance needed, covering on-site repair or towing services. Here we present you the ultimate freedom to roam with peace of mind like never before. Terms & conditions apply.

* Refer to 24/7 Roadside Assists leaflet for details.

Discover the world. Be thrilled that your Hyundai is assured up to 300,000km or 5 years, whichever is earlier, an exclusive warranty for all Hyundai users. That means you can drive up to 164 kilometres a day for 5 years and know that your Hyundai is taken care of. You can even choose to drive across the globe up to 7 times! Our bold testament is a testimony of Hyundai's faith in our vehicles.

*Terms & conditions apply

NEW THINKING. NEW POSSIBILITIES.

People's expectation towards individual mobility requires more than just a convenient means of transportation. The old understanding of cars has become outdated. A car represents individuals' lifestyles, and it became an integral part of their lives. At the same time, the automobile industry has experienced seismic change. Hyundai Motor Company has grown rapidly to become one of the largest automakers, backed by world class production capability and superior quality. We have now reached a point where we need a qualitative approach to bring bigger ideas and relevant solutions to our customers. This is an opportunity to move forward and we have developed a new brand slogan that encapsulates our willingness to take a big leap. Led by our new slogan and the new thinking underlying it, we will become a company that keeps challenging itself to unlock new possibilities for people and the planet.

YOUR LEISURE- CLASS TICKET

Because customer needs vary so widely, Hyundai gives you a choice of i40s: sedan or tourer. Either way, the i40 is your ticket to first-class travel and serene comfort. The cabin is soothingly quiet, while the impeccably engineered chassis delivers a smooth and stable ride. To ensure a lively and engaging driving experience, the i40 steering and suspension systems have been carefully fine-tuned, along with other elements that play a role in vehicle ride and handling dynamics.

THE POWER OF NEW THINKING

The new i40 cuts through the bewildering forest of choices in tourer. Here's a package so complete and so compelling that it changes everything. Combining beautiful balanced style with a spacious interior, agile handling and frugal but dynamic new powertrains, i40 is the tourer that i40 clearly stands out clearly stands apart from the rest. It's not just great styling that attracts new car buyers to the i40 sedan and tourer from Hyundai. It's the new thinking that is evident in every detail, from the fuel-efficient, eco-friendly engines to the impressive build quality and five-star safety appointments. New thinking leads to exciting new possibilities.

EXTERIOR

THE BEAUTY IN THE DETAILS

By taking a little time for a closer look at i40's numerous features and understanding their benefits, a general impression grows into a true appreciation of the car and a real passion for the Hyundai brand.

EXTERIOR FEATURES

HID Headlamps

The i40 comes fitted with High Intensity Discharge (Xenon) headlamps to ensure more safety and effectiveness than conventional headlamps. With a significantly brighter and longer light beam, these lamps bring out details that you might otherwise miss, without causing any glare that can annoy and distract drivers in oncoming cars.

Also, its colour temperature closely approximates that of daylight to ensure complete accuracy. Plus with auto light control, the headlights turn on automatically when it gets dark and off again when there's light.

Hexagonal Radiator Grille

The radiator grille is a signature design element for Hyundai's European lineup. As a natural focal point for the eye, the i40's hexagonal grille conveys an image of power, authority and sophistication.

Tourer Sport Bodykit

New Tourer Sport comes with an optional upgrade of bodykit and bicycle roof rack.

LED Daytime Running Lights

Serving as a high visibility signature of the i40, this highly distinctive LED Daytime Running Lights is supplied as standard.

17-inch Alloy Wheels

Stylish 10-spoke 7.5J 17 alloy wheel design with 215/50 R17 tyre.

Tourer

Sedan

LED Rear Combination Lamps

Large, wraparound rear combination lamps are handsomely sculpted and use an LED array for maximum brightness and enhanced safety. By lighting up a split second faster than conventional lamps, they alert the following driver sooner.

Fog Lamps

Front fog lamps feature clear lenses and an extra low mounting point for maximum penetration in foggy driving conditions.

Side Mirror

Aerodynamically sculpted housing minimises wind noise and includes an LED side repeater to promote safer lane changes.

High Mounted Stop Lamp (Tourer only)

Maximum visibility and safety are ensured by mounting this safety lamp into the roof spoiler and fitting it with an array of bright red LEDs.

Power Tailgate (Tourer only)

The power tailgate system provides a nice touch of convenience but it also helps enhance safety.

FLIGHT i40 YOU
ARE CLEARED FOR
TAKE-OFF

One look at the i40 cockpit and it all becomes clear. There's intelligent design at work here. All the guesswork has been eliminated. All the gauges and controls have been perfectly sized and laid out in logical clusters for effortless operation. As for the selection of materials, they are all premium grade and the detailed workmanship is a joy to behold.

INTERIOR

THE CROWNING TOUCH

How do you take a great package like i40 and make it even greater? By adding technology-rich features which put the pleasure back into driving. Features which make the daily commute something you can really look forward to. Features which let you relax behind the wheel and allow you to enjoy some happy moments.

INTERIOR FEATURES

Audio System
Standard audio configuration includes six speakers, an AM/FM radio and CD player with MP3 playback capability.

Audio Video Navigator (AVN)
(Optional upgrade for Sedan)
The audio visual navigator comes with an LCD monitor and optimally placed function buttons to make listening to music, navigation and hands-free calls even more convenient.

USB Port
Connection ports are provided to connect most types of personal music players including USB memory devices.

Steering Wheel Remote Control
For more convenient and safer driving, the remote switches provide controls over the audio system thereby encouraging the driver to always keep both hands on the wheel.

Bluetooth Hands-free Capability
i40 can be ordered with a Bluetooth option which comes with steering wheel mounted controls and a built-in microphone. Interfacing seamlessly with Bluetooth-enabled phones, this hands-free solution promotes safer driving.

Auto Cruise Control Switch
Loved by long-distance drivers, the auto cruise controls are conveniently mounted on the steering wheel for quick engagement and disengagement. A gentle tap on the brake pedal will also turn off the system.

One-touch Signal System
A handy feature used for signaling lane changes. One light touch and the turn signal flashes three times and then self-cancels.

Light Controller
i40 gets a European-style light switch mounted on the crashpad in response to research findings from customer focus groups.

Full Auto Air Conditioner
Driver and front passenger have their own individual temperature controls. System is able to automatically maintain set temperatures for the two zones.

Deluxe Centre Armrest
The central armrest's multi-box access opens to different compartments providing a place for everything from CDs to other small items... all within a simply soft place rest your arm.

Rear-Seat Video Entertainment Screens
(Only for Tourer and Tourer Sport)
Rear passengers can settle down and watch videos on two separate monitor screens positioned on the back of the front seats.

Rear Armrest With Cup Holder
For the comfort of rear seat passengers, i40 comes with a foldable armrest which includes built-in cupholders.

INTERIOR FEATURES

Sedan

Tourer

INTERIOR FEATURES

TFT LCD Supervision Instrument Cluster

A small marvel of electronic engineering, the TFT LCD supervision gauge cluster brings unprecedented clarity and brilliance to information display, something it manages to do while actually relaxing the eyes and making everything easier to read. Hit the ‘start ignition’ button and, from a black screen, the system springs to life in a glorious rainbow of colours.

Driving distance display

Average fuel consumption display

Nestled between the twin cylinders, the LCD displays a variety of useful information including driving distance, average fuel consumption, parking assist system, and etc.

Panoramic Sunroof

The nice thing about the panoramic sunroof is how everything seems to take on a whole new look when you open it up. The roof also comes with a built-in retractable wind deflector.

Engine Start/Stop Button

Button start eliminates one needless step: inserting the key into the ignition key slot. As long as the key is carried with the person, the i40 can be started and turned off with a simple push of the button.

Tourer Luggage Area

i40 offers minimum 553 to maximum 1,719 litres of boot capacity, and luggage under tray has been applied for additional convenience. It's surprising just how much you can fit into the back of your i40.

Sedan Luggage Space

At 505 litres, plus 20 litres under the luggage board (with Tire Mobility Kit), it's among the most spacious in its class.

Driver & Passenger Power Seat

Adjustable in ten different directions, the electrically-controlled driver seat includes a new power lumbar support to promote greater comfort, alertness and safety.

Electric Parking Brake

The new-style brake frees up precious cabin space. The button switch is computer linked so it's smart. Auto hold keeps brakes applied until gas pedal is pushed.

PERFORMANCE

THAT CONFIDENT FEELING

Once you've taken i40 for a spin and experienced its capabilities, you'll notice a really good feeling coming on. That's the feeling of confidence. Total confidence in the build quality. Pride in the styling. Joy, exhilaration and the sheer pleasure of driving a beautifully engineered machine that hasn't cost you an arm and a leg. With Hyundai's i40, confidence will be your constant driving companion.

NO PETROL STATION IN SIGHT? NO WORRIES

i40's new generation of engines and transmissions are designed to take you further than ever before between fill-ups. Six-speed transmissions and variable valve timing are just a few of the numerous technical innovations that help squeeze more energy out of every drop of fuel.

Economy And Performance In Perfect Balance

The new and highly fuel efficient Nu 2.0 features allaluminum ladder frame construction for improved durability and reduced noise and vibration. Dual Continuously Variable Valve Timing improves engine breathing efficiency. With Gasoline Direct Injection (GDI), maximum horsepower is 178 ps@6,500rpm while torque peaks at 21.8 kg.m@4,700 rpm.

Paddle Shifter

Enjoy rapid-fire up-shifts and down-shifts with these steering column-mounted paddles, with design inspired by the shifters found on high-end sports cars.

6-speed A/T

For driving purists who prefer to do their own shifting, Hyundai offers a six speed. Economical, quiet, ultra-smooth and durable.

SAFETY

NO DOUBT ABOUT IT

i40 proudly takes its place among the safest cars on the road today. But you don't just have to take our word for it. In standardised crash tests conducted by leading independent safety organisations, i40 has equalled the best scores attained so far in its class and, in some cases, bettered them. Hyundai has devoted formidable resources to improving the safety of its cars, including building our own steel mill to ensure the supply of the highest quality metals, to ensure our car bodies are not only the strongest, but lightweight enough to not compromise fuel economy.

Hot Stamping Method

Premium ultra-high tensile strength steel is used in key body areas to maximise strength. But the steel is so hard it must first be pre-heated to 900 °C before stamping. This Hyundai innovation offers more protection to the driver and passengers in the event of a collision.

Ultra-high Tensile Strength Steel

No ordinary, run-of-the-mill steel, the ultra-high tensile strength steel is a high performance special steel alloy applied to safety-critical areas of the body shell where additional strength reinforcement is required. The benefit is superior crashworthiness.

Steel Multi-coned Structure And Bonnet Inner Frame

Applied to the bonnet, this novel structure is highly effective in absorbing impact forces and represents a major advance in reducing the risk of serious head injuries in pedestrian-car collisions.

Brake Assist System

Advanced electronics are capable of making near-instantaneous calculations about road conditions, vehicle weight distribution and the correct amount of braking force in order to bring the vehicle to a safe stop within the shortest distance possible.

MacPherson Strut Front Suspension

A new twist on a classic design: Coil orientation and spring rates have been optimized for improved side load handling. This reduces lean-in during cornering and improves overall handling.

Multi-link Rear Suspension

Noted for outstanding ride characteristics particularly for rear seat passengers.

Motor-Driven Power Steering (MDPS)

Replacing the conventional hydraulic powered steering system with an electric motor has greatly reduced steering system complexity, weight and cost while maintaining excellent steering feel and helping to boost fuel economy.

ADDITIONAL FEATURES

Vehicle Stability Management (VSM)

VSM helps the vehicle maintain directional stability when suddenly braking or rapidly accelerating under asymmetric (wet/dry) road surface conditions where traction among the four tires can suddenly become uneven.

VSM takes safety to the next level by combining the intelligence Motor-Driven Power Steering (MDPS) to avoid loss of control which can result when suddenly braking or rapidly accelerating under asymmetric (wet/dry) road surface conditions. The system operates completely automatically without requiring any input whatsoever from the driver.

Electronic Stability Programme (ESP)

ESP continuously monitors vehicle directional stability and tyre traction. If the system senses the car is about to skid and risks spinning out of control, ESP automatically intervenes, applying the brakes over individual wheels to prevent loss of directional control.

9-airbags Protection

With up to nine airbags available, including each driver and passenger airbags, two side curtain airbags and two front thorax-pelvis side airbags and two rear thorax side airbags at the outboard seating positions plus a new airbag offering driver knee protection, i40 takes every possible precaution to reduce the risk of serious injury.

ISOFIX Anchor

The simple-to-use ISOFIX ensures the child seat securely anchored for maximum safety.

Hill-start Assist Control

This technology brings peace of mind and ends all anxieties about the vehicle rolling backwards when the foot is taken off the brake after a stop on a steep hill.

Parking Assist System

This system helps you park safely. Shift into reverse, and sensors in the front and rear bumpers will start to measure proximity when you're too close, you'll get an audible alert. An back warning camera is also available as part of an optional package.

Knee Airbag

Installed just below the steering column, this new airbag is designed to reduce the risk of serious injuries to the driver's legs and knees in the event of a serious frontal collision.

MIND BENDING CURVES
Taken at the right speed, long curves can be mind-bending. That's the fun of driving. And pure driving delight is what i40 is all about. It's definitely a driver's car that, when put to the task, is quite capable of delivering an exhilarating driving experience: because i40's chassis has been carefully tuned to telegraph just the correct amount of feedback from the road.
